

20 November 1956

Dear George:

25X1A

Reference is made to conversation between the Contracting Officer and [REDACTED] on 24 September concerning additional equipments to complement Systems I and III Read Out Units.

Our using command has established a requirement for two each additional Activity Indicators (event recorders) to supplement the three complete Systems of data reduction presently on order. Accordingly, it is requested that you take necessary action to procure these additional items with delivery concurrent with the three basic systems.

*F. Asher*
